Summary

2,163,530 people were discipled in 2018 at a cost of $0.36 each! Mission Generation served children in nine countries on three continents: Bolivia, Chile, Dominican Republic, Ecuador, Guatemala, Myanmar, Panama, Paraguay and the U.S.

More than what meets the eye - What is not reflected in the statement above are the lives that have been impacted that we are unable to track. For example, it was discovered that a school district was using textbooks that were 12 years old… something totally off our radar. Used texts are sold in the markets and students pass them down to siblings and friends. Another larger factor that is very difficult to track are schools whose students do not have textbooks but whose teachers do. In these cases, a single text serves several classes. School districts have also copied a single set of texts to produce thousands of black and white copies for their students. In addition, young people have become powerful ministers of reconciliation bringing friends and family members into the Kingdom of God--something we call the second wave.

K-12 students, their parents, and education officials serviced by Mission Generation represent approximately 50% of the general population in communities where we serve. This means that 1 out every 2 people in a community are touched by the love of God and gospel of Jesus Christ. This huge level of penetration is transforming culture.

Nationally accreditation school programs continue to have a massive impact on student behavior and performance, which has earned accolades from school officials and endorsements from Latin American governments. As in previous years, schools report that our programs are responsible for up to an 80% reduction in unwed teen pregnancies and a decrease in substance abuse and gang participation. One of the most gratifying is this, every school in the program two years or more, no matter the country, has had ZERO suicides! Reduction in downside outcomes contributed to a 35% increase in high school graduations.

Many might call it REVIVAL because schools funnel every level of society and economic sector through its doors. To meet the growing demand, Mission Generation continued development of digital teacher lessons and manuals; offered accreditation through online courses; and created Apps delivered through Android and iOS, and HTML web applications.

- Countries under contract: Bolivia, Chile, Dominican Republic, Guatemala, Panama, Myanmar, U.S.
- Countries w/o contract: Ecuador, Paraguay (Mexico to begin operations in 2019)

Note: The program in Bolivia has a 14-year head start... which is why it dwarfs other national programs.

### Vision

To give children and the adults in their lives the tools they need to make quality life decisions based on a personal relationship with Jesus Christ and the leading of the Holy Spirit. **Our goal**, to bring Jesus to school.
Administration

Administrative costs in the U.S. were dramatically reduced while increasing performance. Under direction and skilled leadership of our administration, Mission Generation has maintained good relationships with all of the watchdog organizations monitoring our efforts, keeping us in good standing.

Textbook Program

The Textbook Program is divided linguistically between English, Spanish and Burmese versions. Publishing English texts compliant to SEL (Social Emotional Learning) standards for use in U.S. public schools has been arduous, costly and consumed most of our textbook program resources. Timing for the SEL content could not be more timely. ACE (Adverse Childhood Experiences) scores are climbing as a consequence of policies which removed God from school and government. The absence of God resulted in compromised baseline morals and ethics. The results in schools has been dramatic increases in bullying, violence and suicide. The estimated cost in the U.S. is $124 Billion!

Mission Generation’s SEL texts are published from a Biblical world view perspective and have been successfully addressing high ACE scores for over 20 years. Our experience in Latin America has created the perfect segway to bring faith and healing back into American schools and beyond.

Chaplain Program

The chaplain program in Latin America is on fire! After just four years, almost half of the two million people in our school programs were ministered to by chaplains.

School Chaplains mean active Bible classes, spiritual counseling, prayer and open evangelism. Schools serviced with Mission Generation-trained chaplains were reported to be cleaner and more orderly with less disruptions due to student’s misbehavior than schools without chaplains. With Bible literacy comes understanding of love, “the golden rule,” and forgiveness. Bible-based morality leads to a superior learning environment which has a profound effect on academic achievement.

---

1 [https://casel.org/what-is-sel/](https://casel.org/what-is-sel/)
In 2018, our tech team produced 128 hours of online training which is managed through a LMS (Learning Management System). Web-based solutions have allowed *would be* chaplains to study at their own pace and receive diplomas upon completion which are recognized by the state. The digital program was accredited in Chile, an accreditation that translates to every Spanish speaking country in the Western Hemisphere. As such, the scale and scope of the program is unlimited as it reaches into the 100 million K-12 students in Spanish speaking countries.

**Financials**

Total income in 2018 was **$802,698**. We are excited to report that income was up from 2017 especially considering it is the first year that Mission Generation reported separately from its sister organization Forming Lives Inc.

Total expenses in 2018 were **$710,574** which allowed us to carry a balance of **$92,124** into 2019, the largest starting balance since the inception of the ministry in 1990! Total end of year net assets for 2018 were **$16,676**.

Total expenses divided by **2,147,531** (people discipled) means it took just **$0.37/person** to deliver the Word of God, heal lives and prevent victimization of children… The bigger news is in round numbers--we nearly doubled the impact while cutting costs in half!
Conclusion

Latin America: 2018 was a pivotal year in many ways. It was the first year that all sales and distribution of texts were handled by regional publishers. The transition from publisher to content provider allowed us to reduce the cost of labor. This is a huge part of why we were about to dramatically cut cost while increasing impact. We saw the advantage of working this way many years ago, but up until 2018, independent publishers were not willing to represent our program. Years of effort gaining market share made the program desirable. Now that the model has been proven, we are taking it to all the Spanish speaking countries as funds allow.

The goal all along was to add real value while bringing Jesus to school. There is nothing like reciprocal actions to prove the model.

Asia: Work has begun translating our texts into Burmese to be used in Myanmar at the expense of a third party. More languages are on the way as we network with other organizations providing them with school content. Their goal and ours is to deliver the Good News of Christ Jesus to public school in a way that is politically palatable. (Note: only 2% of Myanmar’s population are reported to be Christian yet our Biblical world view text are welcomed.)

USA: Using ACE as a segway to bring God back to U.S. schools is so brilliant it could only be the Lord. It just fell in our lap! Twenty years of work in schools placed us into the perfect position to take full advantage of this opportunity. We consider it our greatest privilege to minister to young people who have suffered the ill effects of toxic stress as little children.

It is generally believed that a single caring adult can create the resilience a child needs to succeed in spite of high ACE scores. Our textbooks put teachers into that role with easy-to-follow lessons, teacher guides, and digital support.
